

Thallophyta

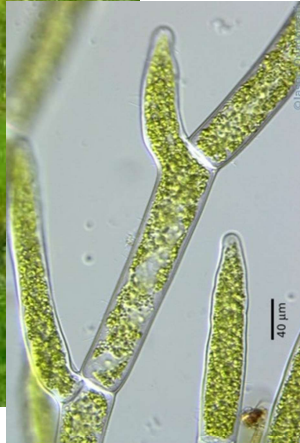

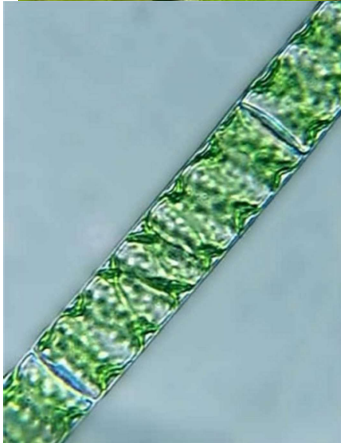

- Plants that do not have well-differentiated body design fall in this group.

The plant body is not differentiated into roots, stem and leaves.

erix, Cladophora and Chara

Bryophyta

- These are called the amphibians of the plant kingdom.
- The plant body is commonly differentiated to form stem and leaf-like structures.
- However, there is no specialised tissue for the conduction of water and other substances from one part of the plant body to another.
- Examples are moss (*Funaria*) and *Marchantia*.
